

SS998A

Gas Detector

Detailed Product Description

Main Function:

1. Carbon monoxide and artificial gas detection.
2. Advanced normal temperature semiconductor gas sensor.
- 3 .Built-in LED indicates working condition, alarm or trouble events.
4. Impulse output (be able to drive the solenoid valve, etc.).
5. Output pattern is selectable
6. Strong ability to resist interference and adapt to environment
7. Detection sensibility is selectable
